

Table 2: The US balance of payments in 2018 in billions of US\$

Current Account		
Exports	2,500	
Imports	3,122	
Trade balance (deficit = minus sign) (1)		– 622
Income received	1,200	
Income paid	1,067	
Net income (2)		133
Current account balance (1) + (2) (deficit = minus sign)		-489
Financial Account		
Net capital transfers (3)	9	
Increase in foreign holdings of US assets (4)	811	
Increase in US holdings of foreign assets (5)	301	
Financial account balance (7) = (3) + (4) – (5)		519
Statistical discrepancy		30
financial account – current account balance		

Figure 1: The US Current Account and Net International Investment Position

Notes. *CA*, *NIIP*, and *GDP* stand for current account, net international investment position, and gross domestic product, respectively. The sample period for *CA* is 1960 to 2018 and for *NIIP* 1976 to 2018. The data source is <http://www.bea.gov>.

Figure 2: Cumulative Current Account Balances Around the World: 1980-2017

Note. The map shows for each country the sum of current account balances (in billions of U.S. dollars) between 1980 and 2017. Cumulative current account surpluses appear in green and cumulative deficits in red. There are six shades of red and green corresponding, respectively, at least one half, one fourth, one eighth, one sixteenth, and one thirty-second of the maximum cumulative current account deficit (U.S.: -\$11,035bn) and the maximum cumulative current account surplus (Japan: \$3,906bn). The data source is Philip R. Lane and Gian Maria Milesi-Ferretti (2017), "International Financial Integration in the Aftermath of the Global Financial Crisis," IMF Working Paper 17/115. Data for former Soviet Union countries start in 1992. Countries for which no data are available appear in gray. Country names are displayed for the countries with the top 10 largest cumulated current account surpluses and deficits.
