Division of Economics

HE3003/HE3021/HE3621 –Econometrics II

This course builds on the earlier Econometrics I and discusses estimation using cross-sectional data, time series data, and panel data. Topics covered include least-squares, maximum likelihood, instrumental variables, probit and logit models, and linear panel data models, among others.

MEETINGS

LEC: Monday 9:30-11:20 am (LT 25 South)

TUT: There are 8 tut groups. You should only attend your tut group.

TEACHING FACULTY

	<u>Office</u>	<u>Telephone</u>	<u>E-mail</u>
Wang Wei Siang	SHHK-04-55	6514 1092	wswang@ntu.edu.sg

CONSULTATION HOURS

During tutorials or by appointment

PREREQUISITE

HE2003 OR HE2005 OR HE2004 (at least A)

RECOMMENDED TEXT* and REFERENCE BOOKS

1. Jeffery Wooldridge, *Introductory Econometrics: A Modern Approach** (7th ed. 2019).
2. Gujarati, D. N. and D. Porter, *Basic Econometrics* (5th ed. 2009).
3. Hill, R.C., W. E. Griffiths, and G.C. Lim, *Principles of Econometrics* (5th ed. 2018).
4. Stock, James and Mark Watson, *Introduction to Econometrics* (3rd ed. 2017).

ASSESSMENT

Your final grade in this course will be based on the following three components.

Assignment & Participation	20%
Two Quizzes	30%
Final Examination (closed-book)	50%

Proposed Lecture Schedule*^

Topics	Reading
1. REGRESSION ANALYSIS: OVERVIEW	Wooldridge: Ch. 1-9 & Lecture Note
2. BASIC REGRESSION ANALYSIS WITH TIME SERIES DATA	Wooldridge: Ch. 10-12 & Lecture Notes
3. BINARY CHOICE MODELS: LPM, PROBIT, AND LOGIT	Wooldridge: Ch. 17
4. ENDOGENEITY AND INSTRUMENTAL VARIABLES	Wooldridge: Ch. 15-16
5. PANEL DATA MODELS: FIXED EFFECTS, RANDOM EFFECTS, AND CORRELATED RANDOM EFFECTS	Wooldridge: Ch. 13-14

* The instructor reserves the right to change the content if it is in the best interest of student learning.
